

Welcome... We're looking forward to our big reunion with the UK broadcast industry! Stand L400 at the Media Production & Technology Show is the place to go to see the very best in video processing solutions and to explore whether we could help solve the problems you're having using IP or SDI video by creating a custom product just for you. Our latest products work with IP, SDI or both at the same time and are software apps which run on our MARBLE media processor hardware. Not visiting MPTS? No problem – talk to Head of Sales Stewart McGhie today (stewart.mcghie@crystalvision.tv) to find out how our standard and customised solutions could work for you.

Making your IP and SDI do exactly what you want – the MARBLE-V1 media processor...

Keying

M-SAFIRE

What is it? IP/SDI chroma keyer app.

Select it because... It's the best chroma keyer we've done – from the output picture quality to the quad split multiviewers which make setup detail checking easier. It's also the only standalone IP chroma keyer.

[Find out more...](#)

M-WEBKEY

What is it? IP/SDI web page keyer app – which can add still, animated and data-driven graphics or text to a video stream by keying the contents of a web page.

Select it because... You'll reduce the cost of creating broadcast graphics and enjoy a simpler workflow.

WWW

"CAPTIONS"

LOGOS

M-KEY

What is it? IP/SDI linear keyer app.

Select it because... If you're looking for an IP linear keyer, it's the only one.

SCOREBOARDS

10:46

Picture scaling

M-PIP

What is it? IP/SDI picture-in-picture device app for adding one or two boxes to the main programme.

Select it because... You want a cost-effective and feature-packed solution for your picture-in-picture effects.

Colour correction

M-COCO-2

What is it? Dual channel IP/SDI colour corrector and legaliser app.

Select it because... With unique adjustments for correcting in-shot monitors, it's our most feature-packed colour corrector yet and will help your equipment budget go further.

Profanity delay

M-CLEANIT

What is it? IP/SDI video and audio profanity delay app.

Select it because... You can tailor it to suit any workflow – with the biggest choice of cleaning options and flexible delays to event/restore – while the multiviewer output will give you total confidence in your content.

Video delay

M-VIVID range

100 frames
200 frames
400 frames
800 frames

What are they? Four IP/SDI video delay apps, providing up to 800 frames of delay (that's 32 seconds in 1080i50).

Select them because... They are ideal for matching any delays in your IP, SDI or mixed system – just pick the delay length and number of channels you need.

Fail-safe switching

M-SAFESWITCH-2

What is it? Dual channel IP/SDI 2 x 1 fail-safe routing switch app.

Select it because... It will guarantee you a clean switch, whether used as a planned maintenance switch or as a sophisticated auto changeover switch with ten fault conditions to trigger the switch including individual audio channel missing and silence.

What next? Get in touch! Either come along to **Stand L400** at MPTS 2022 to say hello to Stewart, Michael and Phil, or contact us now on sales@crystalvision.tv and tell us exactly what you need to do with your IP or SDI video. With Crystal Vision you don't have to be limited by existing technology. Responsive support, reliability, fast delivery times and a five year warranty are just some of the reasons why people like dealing with us.
